

# BANJO: THE LEADER IN LIQUID HANDLING SINCE 1959

For more than 65 years, Banjo has been a symbol of quality, durability, and leak-free performance for professionals in agriculture, industrial business, and manufacturing. Our 2,500+ pumps, valves, fittings, and manifold systems are engineered to help you work faster, eliminate disruptions, and stay productive in any environment.

When reliability matters, just **look for the original yellow handle.**

# WHO WE SERVE

## AGRICULTURE

Banjo has been the trusted name in liquid handling solutions for farmers and OEMs for decades. Banjo's liquid-handling agriculture system ensures maximum uptime, efficiency, and accuracy in fluid transfer. From crop spraying to agricultural fluid management, our solutions are designed to withstand demanding applications.

## CHEMICAL & INDUSTRIAL

Banjo's engineered solutions stand up to the harshest chemical and industrial environments. With components made from chemically resistant materials like polypropylene, stainless steel, and EPDM or FKM seals, our products ensure safe, leak-free performance across demanding fluid handling applications—from manufacturing processes to chemical transfer systems.

## WATER & WASTEWATER MANAGEMENT

Built for durability and precision, Banjo's products support clean water delivery and efficient wastewater management. From flow meters to valves and couplings, our solutions are trusted for their reliability, corrosion resistance, and ease of integration into treatment systems—helping operators meet performance standards and reduce maintenance downtime.

## TRANSPORTATION

From fuel transfer to deicing, Banjo keeps mobile liquid systems running safely and efficiently. Our valves, pumps, and Dry Disconnects are built to withstand vibration, weather, and chemical exposure—minimizing spillage and downtime. For transportation systems that can't afford delays, Banjo keeps you moving.

# OUR 65+ YEAR HISTORY OF INNOVATION AND QUALITY

## THE BANJO DIFFERENCE

Founded in 1959 by Jack Canine in his Crawfordsville, Indiana garage, Banjo Corporation has evolved into a global leader in liquid handling solutions and equipment. Quality and performance are engineered into everything we make. Here's what you can expect from Banjo's liquid handling products and systems:

### Ultimate Liquid Control

Prevents leaks with our secure sealing technology.

### Built to Last

Made with reinforced polypropylene, stainless steel, and industrial-grade seals.

### Made in the USA

Proudly manufactured with American craftsmanship for tough jobs and long-lasting performance.

### No Delays, No Failures

Dependable in every condition for smooth, long-lasting, and worry-free operation.

### Chemical Resistance

Designed to handle corrosive, industrial, and agricultural liquids without degradation.

### Easy to Assemble

Manifold flange connections simplify installation and maintenance.

### High-Flow Efficiency

Our full-port designs, smooth interiors, and optimized flow paths are rigorously tested for uninterrupted liquid movement.

### Trusted by Operators & OEMs

A 65+ year legacy serving those who keep the world moving.

### Expert Support

Here when you need us with top-tier engineers and customer service that sets the standard.

## OUR CORE VALUES

### Trust

We keep our commitments with courage and integrity.

### Teamwork

Winning together with service and inclusivity.

### Excellence

Focused on making a positive impact and building a legacy of greatness.

# OUR PRODUCTS

## Pumps

High-flow, corrosion-resistant solutions trusted in the field and on the job.

## Manual Valves

Zero-leak shutoff valves designed for durability, chemical resistance, and smooth, reliable performance

## Electric Valves

Compact, powerful, and smart. EVX valves deliver precision control with industry-leading toughness and protocol flexibility.

## Manifold Flange Connections

Thread-free assemblies that cut install time, prevent leaks, and make system changes easy.

## Cam Lever Couplings

Quick-connect, heavy-duty fittings built for fast, secure, leak-free connections in the toughest conditions.

## Dry-Mates Dry-Disconnects

Spill-prevention technology built for safe and clean fluid transfers.

## IBC/Tank Accessories

Leak-free tank valves and fittings that fit all major IBC brands—built to Banjo's trusted quality standards.

## Line Strainers

Reliable filtration to catch debris, protect equipment, and keep your system running smoothly.

## Pipe Fittings

Tough, chemically resistant fittings built for tight, leak-free connections in any system.

# A COMMITMENT TO EXCELLENCE

## FIND A DISTRIBUTOR

Banjo's 2,500+ products are available worldwide through our extensive distributor network. Whether you need pumps, valves, manifold systems, or fittings, you can count on fast, reliable access to high-performance liquid handling solutions.

Our distributors benefit from:

- Comprehensive product support – from training to technical resources.
- Wide product availability to meet the demands of diverse industries.
- Expert guidance on product selection and application best practices.

Visit [www.banjoliquidhandling.com](http://www.banjoliquidhandling.com) to find an authorized distributor near you.

## CONNECT WITH CONFIDENCE

When failure isn't an option, demand a Banjo. Get the best in liquid handling technology today.
